

Class Structure for CSE 3000 (Fall 2024)

- ❖ **Arrive to class on time:** Upon arrival, you will form six small discussion groups of no more than five people each. Please change these groups each session, as this offers you the chance to work with as many classmates as possible in advance of choosing your final project groups.
- ❖ **Discussion and Reflection:** In your groups, discuss the day's reading for about 10 minutes. Each of you will take turns sharing a brief verbal reflection, much like the two *written* reflections you will submit this semester. Your reflection can:
 - **Agree** with the issues raised and apply them to your CSE knowledge
 - **Disagree** with the perspective and explain why
 - **Modify or reinterpret** the topic through your CSE experience: for example, positing how certain moral or social ideas might shift in the context of specific technologies, or providing added considerations of greater or equal importance to those discussed.
- ❖ **Presentation:** After your group discussion, I will randomly select six students (one from each group) to present their reflection to the larger group. Try to speak for about 1-3 minutes, during which you should establish your group's position and provide your best arguments and examples.
- ❖ **Question and Debate:** Following each presentation, we will open the floor to questions from your classmates and I, who will *rely on the text* of the reading to probe your viewpoints.
- ❖ **Participation and Voting:** Speakers will be numbered 1-5, and all students present for class will submit an (anonymous) survey on HuskyCT providing the number for the speaker who they think 'won' the debate. Every student who satisfactorily participates in class will receive full participation marks for that day. I will review the votes, and (if the results are sensible) the winner will aggregate one extra credit point that will be applied to their course grade.
- ❖ **Fair Chances:** I will try to ensure that each student has exactly two opportunities throughout the semester to be a speaker.
